WEB-BASED REPORTING

Unrivaled reporting available for merchants through the web

BEST IN INDUSTRY – REAL TIME ACCESS

Merchant e-Solution's unique and comprehensive e-commerce technology offers "best in industry" web-based reporting with real time access and 5+ years of data history. Businesses can take advantage of detailed online monthly statements, transaction reports and information on activity and profitability.

Merchant View

- Access to a range of daily and monthly activity reports with transaction, batch and deposit, reconciliation, and billing information
- View demographic information, historical perspectives and future projections, risk analysis, retrieval and chargeback information, monthly statements, and far more
- Available for single or multiple locations and can be organized and made available by department, business line or other appropriate structure
- Authorized transactions and settled batches available for viewing as soon as they occur
- Detailed authorization information identifies card entry mode, invoice number, authorization code, and AVS/ CVV results for each transaction
- Monitor domestic and international interchange qualification on a daily and monthly basis
- Flexible reporting structure based on corporate entity, business units, country/location, product channels or any other structure relevant to your organization
- Compliant with the Payment Card Industry (PCI) Data Security Standards

Flexible and Secure

- Flexible date ranges with information available by day, week, month, quarter, year or any other desired time frame
- Report information downloadable via Excel format or reporting API
- Truncated card information to minimize security risks
- Transaction search capabilities
- Switch from summary to detail information at the click of a mouse
- Information stored for 5+ years
